Professional Summary

Full Stack Developer Intern with hands-on experience building fast, responsive web applications using **React, Next.js, Node.js, NestJS, Prisma, and PostgreSQL**. I enjoy creating clean, user-friendly interfaces and improving performance across the stack. I also work with **AI tools** for the past 1.5 years for debugging and workflow optimization, and have built a simple resume-analyzer workflow in **n8n**, giving me a practical start in automation.

Work Experience

Full Stack Developer Intern *Aug 2025 – Present*

- Developed a complete **bidding website** with end-to-end backend architecture and contributed to most of the feature implementation while working closely with my mentor. Also integrated the **WhatsApp Business API** to streamline automated messaging and user communication.
- Migrated a large React application to **Next.js**, improving SEO, routing performance, and loading speed.
- Built scalable backend modules using **NestJS, Prisma, and PostgreSQL** to support new product features.
- Created and optimized **REST APIs** for authentication, job management, and internal tooling.
- Collaborated with designers and developers to build responsive UI components and improve user experience.
- Used **AI tools** for debugging, code generation, documentation, and accelerating development workflows.

Technical Skills

Languages: JavaScript, Core Java, SQL

DSA: Arrays, Strings, Recursion, Sorting, Searching (Beginner-level proficiency)

Frontend: HTML5, CSS3, React.js, Bootstrap, Tailwind CSS, NextJs.

Backend: Node.js, Express.js, RESTful APIs, NestJs.

Database: MySQL, MongoDB, Mongoose, PostgreSQL, Prisma

Tools & Deployment: Git, Github, Vercel, Render, **n8n**

Other: Responsive Design, API Integration, Authentication, **AI Tools**

Projects

Zerodha Clone : MERN Stack *Live Demo* | Zerodha Clone

- Developed a responsive trading-platform interface using **React.js** and modern UI principles.
- Implemented reusable components and improved UI performance for smoother user interactions.
- Utilized MongoDB and Mongoose for persistent storage of portfolios and transactions.

Real-Time Weather App : React.js, Material UI, API *Live Demo* | Real-Time Weather App

- Built an interactive weather dashboard using React.js with dynamic API integration.
- Designed clean and responsive layouts using Material UI components.

Gym Website : HTML5, CSS3, JavaScript *Live Demo* | Gym Website

- Developed a fully responsive fitness website focusing on clean layouts and usability.
- Enhanced performance and engagement through optimized animations and UI improvements.

Education

University of Mumbai *Sept 2021 – May 2025*
BE in Electronics and Telecommunication

HSC : *87 percentage* *June 2019 - Mar 2021*

Professional Skills

- Consistent and results-driven approach to problem solving
- Strong attention to detail and ability to deliver pixel-perfect designs
- Fast learner with a proactive attitude toward adopting new technologies.
